

THE END TO INDIVIDUAL FREEDOM

World Economic Forum

Overview

- The **World Economic Forum** (WEF) was founded fifty years ago.
- It has ...
 - **gained** more and more prominence over the decades and
 - has become one of the leading platforms of **futuristic** thinking and planning.
- As a meeting place of the **global elite**, the WEF brings together the
 - leaders in **business**, and
 - **politics**, and
 - a few selected **intellectuals**.
- The main thrust of the forum is **global control**.

Overview

- According to the projections of the WEF's "Global Future Councils," **private** property and privacy will be abolished during the **next decade**.
- The coming **expropriation** would go further than even the communist demand to abolish the property of production goods but leave space for **private** possessions.
- The WEF projection says that **consumer goods**, too, would be no longer private property.

Overview

- If the WEF projection came true, people would have to **rent** and **borrow** their necessities from the state, the sole proprietor of all goods.
- The supply of goods would be **rationed** in line with a social credit points system.
- **Shopping** in the traditional sense would disappear along with the **private** purchases of goods.
- Every **personal move** would be tracked electronically, and all **production** would be subject to the requirements of clean energy and a sustainable environment.

Overview

- To attain “sustainable agriculture,” the food supply will be mainly **vegetarian**.
- In the new **totalitarian** service economy,
 - the **government** will provide basic accommodation, food, and transport while
 - the rest must be **lent** from the state.
- The use of **natural resources** will be brought down to its minimum.
- In cooperation with the few key countries, a **global agency** would set the price of CO2 emissions at an extremely high level to disincentivize its use.

Review

1. **People will own nothing.**
Goods are either free of charge or must be lent from the state.
2. The United States will no longer be the leading superpower, but **many countries** will dominate.
3. Organs will not be transplanted but printed.
4. **Meat consumption** will be minimized.
5. Massive **displacement** of people will take place with billions of refugees.
6. A high global price will be set to limit **carbon dioxide** emissions.
7. People can prepare to go to **Mars** and start a journey to find alien life.
8. **Western values** will be tested to the breaking point.

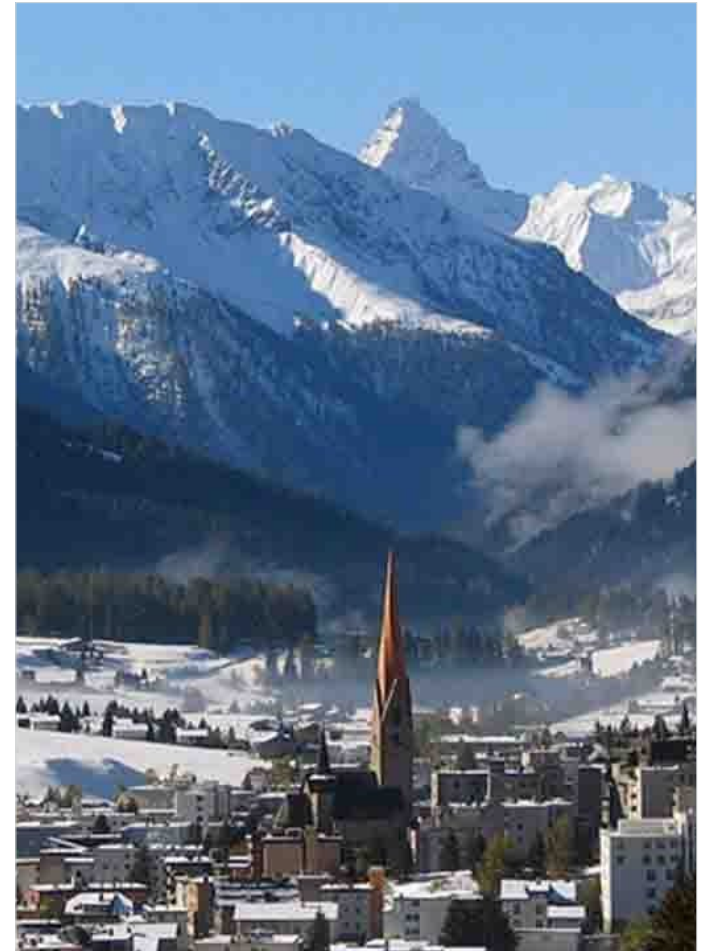

Key Persons

- **Klaus Martin Schwab** is a German engineer and economist best known as the founder and executive chairman of the World Economic Forum.
- Other prominent **board members** are:
 - George Soros
 - Bill Gates
 - Al Gore
 - Prince Charles
 - Most global corporations and banks
 - And many others . . . especially from the Democrat party.

Annual Meeting - Davos

- The **flagship event** of the World Economic Forum is the invitation-only annual meeting held at the end of January in **Davos**, Switzerland.
- It brings together **chief executive officers** from its 1,000 member companies, as well as selected
 - politicians,
 - representatives from academia,
 - NGOs
 - religious leaders, and
 - the media in an alpine environment.

Annual Meeting - Davos

- The winter discussions ostensibly focus on **critical issues** of global concern, such as
 - globalization,
 - capital markets,
 - wealth management,
 - international conflicts,
 - health solutions
 - social equity
 - environmental problems, and their possible solutions.

The Great Reset

- The basic idea of the **Great Reset** is the same principle that guided the radical transformations from the French to the Russian and Chinese Revolutions.
- It is the idea of **constructivist rationalism** (*follow the science*) incorporated in the state.
- While the **state** will be the tool to implement this brave new world, it will be ruled by **leaders** of specific political parties, media, and certain inclusive social groups.

The Great Reset

- While earlier **totalitarian** regimes needed mass executions and concentration camps to maintain their power.
- With the help of **new technologies**, it is believed that **dissenters** can easily be identified and marginalized.
- The **nonconformists** will be silenced by disqualifying divergent opinions as **morally despicable**.

The Great Reset - Social Consent

- The **bait** to entice the masses is the assurances of comprehensive **healthcare** and a guaranteed **basic income**.
- The promoters of the **Great Reset** promise a world without diseases.
- Due to **biotechnologically** produced organs and individualized **genetics-based medical treatments**, drastically increased life expectancy and even **immortality** is said to be possible.
- **Artificial intelligence** will eradicate death and eliminate disease and mortality.
- The **race** is among biotechnological companies to find the **key** to eternal life.

The Great Reset - Social Consent

- Concerns like “lifestyle diseases, climate change, the refugee crisis, environmental degradation, completely congested cities, water pollution, air pollution, social unrest, and unemployment” are **things of the past**.
- If we only let these self-professing benevolent nobles rule our lives, we will enter a **utopian** environment where there will be no more wars, sickness, and death or dying.
- Where do we sign up?
- Or what can possibly go wrong?

Klaus Schwab's Dystopian Global Reset
